† The expenditure from Loans has been classified in this table under the headings made use of in the Schedules to the various Loan Acts, this being the method adopted by the Treasury. Information as to the total amount *actually* spent under some headings of Expenditure is consequently not obtainable, certain items being included under the indefinite heading "Development of Goldfields and Mineral Resources." "Electric Telegraphs," and "Water Supply and Sewerage" are probably most affected by this classification.

* In cases where blanks occur the article, if imported, was probably classified under some general heading and not particularly specified. † The value of dynamite imported during 1896 (£45,299) was accidently omitted when making up the Return of Imports for 1896. The amount, therefore, is accounted for in the total Imports for 1897. ‡ £42,000 out of this amount was, through a clerical error, omitted from the total amount of Imports for 1896, and therefore is accounted for in the total Imports for 1897. § Through a clerical error, £7,080 of this amount was omitted from the total amount of Imports for 1895, and is therefore accounted for in the total Imports for 1896.

* Included under heading "Orchards."

** The apparent falling off in 1896-97, as regards the heading "Orchards," is to some extent explained by the fact that the acreages now separately specified under "Onions," "Other Root Crops," "Market Gardens," etc., were in previous years all included under the one heading.

† *The acreages under "Vines" and "Fruit Trees" in 1896-97 and subsequent years have been compiled on the basis of the actual number of vines and fruit trees planted according to a standard supplied by the Department of Agriculture, which allows 600 vines or 100 fruit trees to the acre; a comparison between the figures of these years and those of previous years is, therefore, valueless.*

‖ Includes 27½ acres *miscellaneous crops.*

* In cases where blanks occur, the article was probably classified under some general heading and not particularly specified.

Note.—This table has been compiled with the special object of showing the value of the importations into Western Australia during the last 10 years of such products of the Soil and of Live Stock as could have been produced within the Colony, and to serve as a basis for calculations as to the market reasonably to be expected therein for home-grown products.

* For the purposes of comparison with the figures for 1899, the particulars relating to quartz-reducing works have been expunged from the 1898 returns, as Establishments of this nature will henceforth be dealt with in Part VII of the Statistical Register dealing with Mining Statistics.

† These returns are incomplete, the figures for one Forest Saw Mill not being available.

* Bursaries of the value of Ten pounds have been offered to the girls attending the Elementary Schools of the Colony for several years past. In 1895 they were extended to the boys also.

† The examination being similar to that laid down for the High School Scholarships, one of which happened to be vacant, this Scholarship was, in place of the bursary, offered to, and accepted by, the boy who had passed ; no bursary was, therefore, actually given.

‡ In 1899 the Bursaries were for boys and girls without distinction of sex. One boy and one girl obtaining equal marks, the prize was divided between them. In the above table each has been credited with winning a bursary.

PART XII.—MISCELLANEOUS.

No. 6.—*Rainfall in Western Australia during 1899.*

With averages (to the end of 1899) for all stations having at least 5 years' record. 100 Points=1 inch. The Sign ... signifies "no rain fell." The Sign — signifies "no record."

NOTE.—The stations are grouped into districts, and these are subdivided into square degrees, which are figured according to the latitude and longitude of the N.W. corner of each square, the first two figures representing the latitude, and the last two the longtitude, less 100°. Thus Perth is in the square 3115, showing that its latitude is 31° odd minutes, and its longitude 115° odd minutes. The mean rainfall for each square degree is adopted from all the stations situated in that square having complete records for 1899. The average is taken for all years up to and including 1899.

Square.	Locality.	Total for 1899.		Mean for Square Degree during 1899.	Average to 31st December, 1899, for Square Degree.	No. of Years for Average.
